

Keegan, Steph, Antonio, Cait, Abby

Q1)  $26 \cdot 25 \cdot 24 = 15,600$

Q2) on my 18<sup>th</sup> time running the code it finally produced dot.

Q3)  $w = 26 \cdot 25 \cdot 24 \cdot 23$   $w = 358,800$

Q4) What we thought was interesting in the reading was, men were sent to search for the bookman. We thought it was interesting because it opened our eyes to how many different possibilities probabilities can have. This part appeared when they were asking books B and C to locate book A. They stated that this could go to infinity. we thought it was an interesting way to explain how probability works.
